```

// -----
// * Assign ( long double, ConstStringPtr, ResIDT )
// -----
// Assignment from a long double using a formatting string and the
// resource ID of a NumberParts table
//
// This function allows you to specify number formatting strings using
// a standard NumberParts table, and then obtain format records that
// use the local System NumberParts as specified by the user.
//
// For example, assuming that 'NoPt' resource 200 is a standard US
// NumberParts table,
//
// myString.Assign(1234.56, "\p###,###.##", 200);
//
// On a machine with US number formatting, myString will be "1,234.56".
// On a machine with Danish number formatting, myString will be
// "1.234,56" (Danish use 1602 the thousands separator and ',' as
// the decimal point).
//
// However, if you use the Assign() routine above:
//
// myString.Assign(1234.56, "\p###,###.##");
//
// This will correctly set myString to "1,234.56" on a machine with
// US number formatting. But will not work for Danish number formatting,
// where the format string is invalid.
//
// utFormatResult may be nil. If so, not format result is passed back.

LString&
LString::Assign(
    long double    inNumber,
    ConstStringPtr inFormatString,
    ResIDT         inNumberPartsID,
    FormatResultType* outFormatResult)
{
    Handle partsH = ::GetResource(ResType_NumberParts, inNumberPartsID);
    ThrowIfResFail_(partsH);
    StHandleLocker lock(partsH);

```

The screenshot shows a window titled "Untitled" with a menu bar containing "Collection". Below the menu bar is a search bar containing the text "1600x1200 Images". Under the search bar are four tabs: "Item", "Query", "Comments", and "See Also". Below the tabs is a section labeled "Of Class:" followed by a dropdown menu showing "Image". Below this are two rows of search criteria. The first row has a dropdown for "Width", a dropdown for "Is Equal To", and a text field containing "1600". The second row has a dropdown for "Height", a dropdown for "Is Equal To", and a text field containing "1200". To the left of the second row is a dropdown menu showing "And". To the right of the search criteria are three circular buttons with minus, minus, and plus signs respectively. Below the search criteria is a button labeled "Click to add a term:".
